

COMMUNICATED FOR THE SENTINEL.

Alumni Association of Pennsylvania College.

At the recent annual meeting, A. R. Stevenson, Esq., from the Committee appointed to collect information respecting the pursuits, location, etc. of the members, submitted the following report, which was unanimously adopted and ordered to be printed.

The undersigned, who were appointed by a resolution adopted at the last meeting of the Alumni Association of Pennsylvania College, a Committee to collect such statistical information as they might be able, relative to the Graduates of Pennsylvania College, report the following as the result of their examination:

The number of Graduates of the Institution is seventy-six.

Of this number twenty-six have been licensed to preach the Gospel, and are engaged in prosecuting that calling among the Lutheran Ministry.

Seven have been admitted as practicing Attorneys and Counselors-at-Law, and are now engaged in prosecuting that calling.

One has graduated at a Medical University, and is now engaged in the practice of Medicine.

Two are engaged in Mercantile Business.

One is engaged as Principal of one of the departments of a Literary Institution; and One is filling the appointment of Purser to one of the Navy Yards under the care of the General Government.

Thirty-one are now passing through the course preparatory to licensure as Ministers of the Gospel.

Three are preparing themselves for the practice of Medicine; and

Five are preparing themselves for admission to the Bar.

Of those who have entered upon active life, and are pursuing their respective vocations—

20 are at present located in the State of Pennsylvania.

1 is in the State of New York,
6 " Maryland,
4 " Virginia,
1 " Illinois,
3 " Indiana,
1 " Ohio,
1 " Iowa Territory, and
1 supposed to be in Michigan.

Thirty-two graduates of the Institution have had the honorary degree of Master of Arts conferred upon them.

Two out of the whole number of graduates have deceased.

We have endeavored to compare the position of the Parent Institution, thus represented, with that of other Institutions of similar character, and believe that she suffers nothing in the comparison. Considering the short term of her existence, she has her full complement of sons, and has contributed more largely than any other Institution in the country, to increase the number of those whose lives are devoted to professional pursuits.

In the enjoyment of chartered rights and privileges but a half score of years, and without that reputation which a half century's existence would have given her—she stands like a vigorous tree, casting an inviting shadow, strong and healthy in her growth, and with her shoots sprouting in almost every variety of soil. Her sons are scattered here and there throughout the whole American domain, embarked in the honorable professions, and responsible business stations in life, and enjoying public confidence. Throughout the entire extent of the Lutheran Ministry, men from amongst us are to be recognized. At home abroad—in the West, yes, in the "Far West"—our associates in Literature are to be heard at the bar of Justice, pleading for the innocent and accused, and invoking the penalties of the law upon criminals and wrongdoers. At the sick bed, amidst diet and death, the minister of the healing art may be found, whose first lessons in science were received at our Institution.

It will be perceived further, that three-fourths of those of our Alumni, who are in active life, are among the Ministry; and that the same proportion of those preparing themselves for useful employment, have in view the same calling. How great and incalculable, is it not right to assume, the influence for good, which the Alumni of Pennsylvania College are exerting and will exert upon the public mind. Other Institutions may boast of their great and honored men—their sons who have worn the laurels of political and civic distinction; but it is for us to present an host of sons, marshaled in defence of morality and religion—messengers of truth, whose warfare is a holy one, to exterminate vice and establish virtue—to banish sin and proclaim holiness—and whose weapons, tempered, are drawn from the armory of God.

If such be the spheres in which our associates are laboring, does not the parent Institution bid fair to be pre-eminently useful to the country? and is she not pre-eminently entitled to the confidence of the whole country? May it not with assurance be asserted, that in the hands of a generation guided and instructed by such principles, the destinies of the Republic will be safely kept—that while "liberty and independence" may not be ruthlessly assailed, Virtue, first in the glorious motto of the Republic, is graven upon their hearts, practiced in their lives, and enjoined upon all men, both by precept and example, and the insuperable bar to anarchy and misrule. When the flood-gates of knowledge are guarded by such keepers, the stream must be purified from all the pollutions which darken its surface and stain its waters; when such men give tone to society—we have a sure guaranty against the inroads of infidelity, repudiation, and all their baneful train.

Moral principle and political integrity must predominate over all the grosser feelings, which men of loose morals, interested views, and wicked practices, would fasten upon the public.

All of which is submitted.

A. R. STEVENSON, } Comm.
M. L. STOEVER, }

The following resolutions were also adopted, which may prove of some interest to the members of the Association, who were not in attendance at the meeting:

Resolved, That a Committee of one from each graduating class be appointed, to prepare at our next meeting a plan by which we can afford the greatest pecuniary aid to our Alma Mater.

The Committee consists of Rev. Ezra Kellers, Rev. William H. Smith, Rev. George Diehl, Professor M. L. Stoever, Rev. James L. Shock, Rev. G. Bussier, and Messrs. Jacob Scherer, R. G. Stoever and J. E. Gaul.

Resolved, That those members of the Association who may find it impracticable to attend our annual meeting, be requested to send a communication to the Society, containing such information in regard to their location, pursuits, success in calling, etc., as may be interesting and desirable.

A mysterious but just Providence, having deprived the Association, during the past year, of a valued member—one who had for years become an ornament of the Alma Mater, it was

Resolved, That by the death of Mr. James Charles, the Alumni Association of Pennsylvania College have to deplore the loss of a beloved brother, whose attainments, moral worth, and amiable qualities, will long be cherished in affectionate remembrance.

Resolved, That a committee of three be appointed to communicate to the parents of our deceased friend the foregoing resolution, with an expression of our sincere condolence in their bereavement.

Committee: Prof. M. L. Stoever, A. R. Stevenson, Esq. and Rev. James R. Keiser.

Rev. Wm. Smith, of Philadelphia, was elected to deliver the next annual address before the Association; and A. R. Stevenson, Esq. was appointed alternate.

Chesapeake and Ohio Canal.—A letter to his friends in this city, says the damage done to the Canal by the rains of last week, and the freshets in the Potomac is very extensive, so much so as to render it doubtful, in the writer's opinion, whether the means can be obtained for its proper repair. The flood of last week was an extraordinary one, the waters of the Potomac having risen to a higher point than had ever before been known. *Balt. American.*

Father Miller.—Father Miller favored the people of Clarendon, N. H., with a lecture in the town house on Monday week. The old gentleman is yet strong in the faith that we shall see the closing up of all subversive changes the present year. From the poor success which had lately attended his labors, having, as he said, witnessed but four conversions for the last four months, he was fearfully apprehensive that this door of mercy had been closed forever.

Newspapers and Postage.—We learn that the Post Office Department has issued a Circular, prohibiting the transportation of newspapers, pamphlets and mail matters, out of mail, over the route between Philadelphia and Baltimore. The Company have, as in duty bound, determined to comply with this requisition. For the future, then, no newspapers can be sent between the two cities, except in the regular mail.

Mike Walsh, the famous leader of the New York Sobriety Society, has a rough road to travel. In the last week he has been tried for four times and once assaulted and battery case. On two of the trials, Mike, and the assault and battery case, he was convicted; on the two other cases the jurors could not agree and were discharged. He has several other cases on hand.

The New Jersey Murders.—The trial of Joseph Carter, on charge of having murdered John B. Parke and the Carter family at Warren, N. J., in May last, was brought to a close on Thursday by a verdict of acquittal from the jury. The case occupied the court for three weeks, during which time nearly if not quite a hundred witnesses were examined. All the testimony, however, was circumstantial—so that the mystery in which this fearful tragedy had been shrouded yet remains unexplained.

Magnanimity of a Revolutionary Hero.—The United States Government having recently allowed Nathan Beyer, Esq., of New Haven, (Conn.) the arrears of a pension due him, amounting to \$3,000, the old veteran magnanimously distributed the amount among those who were his creditors in 1820, when he failed in business.

A Dreadful Deed.—We a day or two ago gave a brief account of an accident on the Boston and Portland Railroad, which resulted in the death of Mr. Horace Adams, the engineer of the train in which it occurred, and some injury to two or three of the passengers. The Portland Bulletin of Thursday contains further particulars. It appears that the end of one of the rails had been pried up a foot or eight inches, and several sticks of wood thrown on the track, for the purpose of insuring a murderous catastrophe. The baggage car, and the saloon of the first passenger car, in which were six or eight persons, were shivered to pieces. One lady in the latter, the wife of Col. Frier, of Brownfield, was seriously, and another whose name is not mentioned, slightly injured. The preservation of the occupants of the first saloon was most extraordinary, as it was much broken up. A child nineteen months old, which was sleeping there, did not wake during all the horrid confusion, and was passed through the window, sleeping as calmly as if reposing on its mother's bosom. Mr. Adams resided in Portland, and bore an excellent character. He was married about a year since and has left a young widow, with a babe in her arms, to lament his loss. *Phila. Inquirer.*

Prentice says that some of the Locofoco papers insist that Mr. Van Buren is the stronger for having been defeated in 1840, and think it he should be defeated in 1844 and 1848, he will be a free man, and a successful candidate in 1852.

Early Frost.—There have been several frosts in New York and Connecticut. A Kellers, Rev. William H. Smith, in the latter State, says that the frost on Tuesday night was six or seven degrees, and apparently killed much of the corn, wheat, and other crops. The smaller vegetables.

Spots upon Mahogany furniture, says the Boston Mercantile, caused by cologne water, or alcohol in any form may be immediately removed, and the place restored to its original color and beauty, by the application of a few drops of oil. We believe this to be a sure restorer. Try it.

The fine water power at command in Richmond is bringing into operation manufacturing enterprises of various kinds, on an extensive scale. In time it promises to be among the most important points of the Union.

Trouble in New York.—The North American says:—It seems that the friends of Mr. Calhoun were greatly incensed by their treatment at the Syracuse Convention. After it was decided that thirty-six Van Buren Delegates must be sent to the National Convention, Mr. Taylor, a delegate from New York, protested in a speech at some length, declaring that Mr. Van Buren never had the popular feelings of the Democracy with him. It concluded by promising to protect, adding, according to the Express, that the signers would then withdraw from the convention, return to their constituents, and that when the proper day arrived, the Democracy of the State would elect through the ballot box their delegates, and instruct them to appear at the doors of the National Convention, and there demand admission in the name of the sovereign people.

In Vermont, Mr. Matlocks, the Whig candidate, has failed in an election by the people by a few hundred votes; owing to the number of votes given to the "abolition" and "scattering" candidates; but will of course be chosen by the Legislature when it assembles. Both branches of the Legislature are decidedly Whig.

Mr. Marsh and Mr. Foot, the Whig candidates in the first and third districts, are elected to Congress by decided majorities. In the second and fourth districts there is said to be no choice.

Origin of the Slave Trade.—It is a singular historical fact, that the slave trade originated in motives purely benevolent, and at the suggestion of one of the most philanthropic men of the age in which he lived, whose mind was under the influence of prejudice. Bartholomew de Las Casas, the Bishop of Chiapa, in Peru, witnessing the dreadful cruelty of the Spaniards to the Indians, exerted all his eloquence to prevent it. He returned to Spain, and pleading the cause of the Indians before the Emperor Charles V. in person, suggested that their place as laborers might be supplied by negroes from Africa, who were then considered as beings under the proscription of their Maker, and fit only for beasts of burden. The Emperor, overcome by his forcible representations, made several regulations in favor of the Indians; but it was not until the slavery of the African negroes was substituted, that the American Indians were freed from the cruelty of the Spaniards. *Boston Journal.*

Deadly Assault in the Railroad Cars.—A deranged or drunken man, whose name we have not been able to learn, committed a most outrageous assault upon his fellow travellers last night. Trapped that when about five miles from town, a person who was seated in the second class car on the Andes road, made a deadly assault upon the other passengers, during which one of more were dangerously injured. A feeble invalid named J. H. Matthews, of Painesville, O., who was returning from Saratoga, was stabbed in the right side between the fifth and sixth ribs, by some unknown instrument, probably a jack knife, and now lies in a critical state at the Buffalo House.

Another person named Lewis Jones, residing in Chautauque Co., was also badly wounded in the arm and side, and it is believed that the person committing the deranged man has also received serious injury. Of this however little is known as he is now in pursuit of the man, who leaped from the car after committing the outrage.

The assault was evidently the act of sudden impulse, and as there was no light in the car, the passengers were left entirely at the mercy of their assailant. Doctors White and Wilcox were professionally called, and entertain an opinion that Mr. Matthews will survive, although his wounds taken in connection with his feeble state, of health render his case critical. Mr. Jones was able to proceed on his journey after having his wounds dressed. *Buffalo Com. Adc.*

Look Out for Gilded Dimes.—A few ten cent pieces, that had been gilded by the galvanic process, were passed upon some of the country folks in the town market as quarter eagles. It would be well to examine all gold pieces with the utmost scrutiny when offered in payment for purchased articles. *Phila. Sentinel.*

Chicken Hatching.—The New York True Sun states that some enterprising persons in Brooklyn, have established an Institution in that city for the purpose of hatching chickens on a large scale, which is dignified with the name of Poliochion. It comprises five or six long buildings, and several acres of land. They have a similar affair in England, called the Eccelesbreton, which is in successful operation and turns out one hundred chickens a day. The practice has long prevailed in Egypt, and recently has been introduced in France. Reaumur, we believe, first succeeded in raising chickens by means of a common oven. The modern apparatus consists of a series of flues supplied with hot water. A good deal of care is necessary in raising the youngsters, as they do not prove very healthy. It is said they have to be taken care of by the old hens for at least a month after they are hatched.

MANUFACTURES IN VIRGINIA.—The impulse which has been given to American industry by the Tariff of the last Congress is not limited to particular sections of the country, but extends to all parts of the Union. The exports of domestic goods from Boston have been astonishingly large. In one week up wards of fourteen hundred bales of manufactures were sent abroad from this port. But it is in the South that we look with particular interest, and we are gratified to find that animation and activity have sprung up in that quarter under the influence of the same impulsive cause which have given new life to the industry of the North. The Richmond Compiler of the 15th inst. says:

The Manchester company and the Richmond Factory, (formerly Cunningham, Anderson & Co.) are in full operation, and have orders three weeks in advance of their manufacturing capacity. This is really gratifying, for the stand still position of things for some time past, has been highly injurious to manufacturing establishments, in which the amount invested is so large, that great loss is occasioned by their being idle.

The Compiler goes on to speak of the wonderful improvements which have been made of late years in the style and quantity of American goods. These improvements have been made so rapidly that the fabrics of the present year exhibit a strong contrast with those of the last, to say nothing of former years. We had occasion some time ago to examine samples of American cloths and cassimeres at the establishment of Messrs. Parham & Co. of this city, agents of some of the large manufacturing works at Lowell. These samples were from the fabrics of several years, and indicated the successive improvements of each year. The changes thus exhibited were striking, and with respect to the last year a degree of excellence was manifested which seemed to leave nothing more to be desired. It is worthy of note, moreover, that the various improvements in quality did not enhance the prices.

In the manufacture of calicoes a similar progression has been made both in regard to the quantity and the quality of fabrics manufactured. In 1825 upwards of 150,000,000 yards of calicoes were imported. Last year the importations fell off to 15,000,000 yards, while the American production reached the enormous amount of 159,028,600 yards. At present we are exporting calicoes, and in a short time, under a wise domestic policy, we shall be able to rival the most choice qualities of the foreign article, and compete with the English and French in the markets of the world. The Richmond paper from which we have already quoted, says that an English Agent, passed through that city a few weeks since, who has been in the habit of selling hundreds of packages of calicoes, but who this year, has only found purchasers for eight packages.

The manufacturing capabilities of this great country are not half understood. A new era is opening. If the prosperity which it spreads before us, are not blasted by ruinous legislation, the time will soon come when "national independence" will be a phrase of more substantial significance than it has yet borne amongst us. *Balt. Amer.*

Balloon Ascension.—Mr. Wise made another successful ascension at Winchester, Va., on the 15th. The day was unfavorable, and it was late when he set off. He passed handsomely over the town, and after descending about a mile to the West, was brought back in triumph. After Mr. W. alighted, Mr. Grever entered the basket, and also passed over the town. A great crowd of spectators were highly gratified.

A Family near Poisoned.—On Monday a respectable family residing in the western part of the city, partook of some soup at dinner and shortly thereafter the husband was taken suddenly ill with a pain in his stomach and was obliged to retire to his chamber, which he succeeded in doing with great difficulty. In a few minutes afterwards, the lady of the house was also seized with severe sickness, and then the children were likewise taken sick, and all having the same symptoms.

A physician being sent for administered an emetic to each member of the family, and having examined the soup found it contained numerous worms, known as the parsley worm, which is of a poisonous character, and to their presence was to be attributed the illness of the family. On Monday night the lady and her children had recovered, but the gentleman still remained very ill. *Phila. Amer.*

The Rev. Amos Lefevre, who about six or seven months ago, was charged with the seduction of a young girl, one of his congregation, under most aggravated circumstances, has been tried in Bradford county, Pa., where the circumstance occurred, and convicted of administering poison to Miss Woodburn, with an intent to murder her. He has now a comfortable prospect of a residence in the penitentiary for his outrageous hypocrisy and villainy.

The next session of the Legislature of Virginia is looked to with uncommon interest. Upon its movements depends in a great degree the fate of the State. "The Calhoun wing of the Democracy," says the Richmond Whig, holds the balance of power between the Van Burenites and the Whigs.

One of the stages of the Good Intent Line was upset near Washington, Pa. on Wednesday last, and four of the passengers were seriously injured.

"I beg your Pardon," as the condemned criminal said to the Governor. "Granted," says Darcy.

TO BE REMEMBERED AT THE POTLIS.

Keep it before the People: That James Clark, Jesse Miller and Wm. H. Foster, the Locofoco candidates for Canal Commissioners, are all old office holders, who have participated in and connived at the gross extravagance and corruption which has marked the course of the Locofoco administration.

Keep it before the People: That during the same year the expenditures on the finished lines of the Public Improvements exceeded the revenue three hundred and sixty thousand five hundred and ninety five dollars; whilst the year before the same thing yielded a revenue of over and above all expenses, of three hundred and fifty four thousand one hundred and eighty dollars. And the State lost thus, through the dishonesty and bad management of the officers on the public works, during this one year, at least seven hundred thousand dollars.

Keep it before the People: That whilst Wm. H. Foster was Engineer on the North Branch Division, the most shameful abuses were practiced on that line of the public works; such as under-estimating the Whig contractors, with the avowed purpose of breaking them up and driving them off the line, and making the most extravagant estimates for the Locofoco contractors, as a reward for their party services!

Keep it before the People: That Jesse Miller has been constantly in public office for 18 or 20 years, and has always been an ultra party man, willing and ready to go any length to carry a party measure, wholly regardless of the public interests!

Keep it before the People: That Jesse Miller was Auditor in the Treasury Department, under Martin Van Buren, when millions of dollars were stolen from the public treasury by the corrupt and dishonest public officers under that administration.

Keep it before the People: That such is the character of the Locofoco candidates for Canal Commissioners; and if they are elected, the same disgraceful system of Locofoco extravagance, corruption, favoritism, fraud and plunder, will be continued upon the public works which has been practiced for years past.

Keep it before the People: That William Tweed, Benjamin H. Cover and Simon Guilford are New Mex. men, from the ranks of the people, who have not been corrupted by the power of party patronage, but are honest, capable and faithful men, in whose hands the Public Works will be conducted with economy, prudence and skill, and for the benefit of the State and not of a party!

Keep it before the People: That if the tax-payers of Pennsylvania wish to institute real reform on the Public Improvements, they must keep them out of the hands of old Locofoco office-holders, and place them in the hands of new men, who are honest and capable—such men as TWEED, WEAVER and GUILFORD. *Harr. Int.*

William Tweed, Esq.—The Sunbury American, in a brief notice of the Whig nominations for Canal Commissioners, says: Mr. Tweed, of this county is well known as an honest and able man. This is the testimony of an enemy, says the Harrisburg Intelligencer, from the home of Mr. Tweed, where he is best known. The same may be said by the said Messrs. Guilford and Weaver, in their respective homes. These are the kind of men—honest and capable—that the people of Pennsylvania want for their Canal Commissioners.

Wm. Tweed, Esq.—Although this gentleman has never obtained any great political notoriety, yet he is well known in many parts of the State as a man of excellent qualities of mind and stainless probity and integrity. The Columbia Protector gives the following instance of Mr. Tweed's conscientious honesty. It is really refreshing to hear of such noble conduct in these days, when conduct so much the reverse is daily practiced—

Will such men for Canal Commissioners, our State Treasury would be safe. The Protector says, Mr. Tweed has ever been a consistent Whig, and as to his private character, it is as pure and unsullied as it could be possible for mortal man to maintain it. To show how eminently successful he has been in sustaining an honest reputation, we will relate an anecdote, given us by an old acquaintance of his, and on whose authority we will vouch for its truth. Mr. Tweed at one time, had fallen into the dangerous snare of gambling, and his effects distributed among his creditors, giving them about fifty cents to the dollar. A few years after, having recovered from the fall, he not only paid off every cent remaining, but added the interest, from the time of contracting the debts. Specimens of honesty are as rare as they are noble and generous, and are known only to the truly good and virtuous.

A Short Horse is soon Curried.—Mr. Van Buren, whilst President of the United States, whilst and deliberately misrepresented and subscribed to measures that the people entirely and deliberately pronounced wrong and foolish in a country—and they cut him out of office. He is now again a candidate for office—and the simple question is, has he showed a change of principle since he was supposed the people themselves to have changed sides? *N. Y. Times.*

The Election.

It would appear to be scarcely necessary to call upon the friends of correct principles in our County, to be up and doing at the coming Election; but the extraordinary efforts that are being made by our opponents to achieve another victory, are of a character not to be treated lightly. Our neighbors of "The Compiler," we are pained to notice, (because he ought to know better) asserts plainly, that "the interests of the people have been shock to the very center of our county, and have been increased to an enormous degree—our ballot boxes and jury wheels tampered with—our interests neglected—our county disgraced and ruined." These are the arguments used—and the effect no doubt intended, is to operate in favor of their candidates for office. Now, these are statements which no intelligent man believes, and we only refer to them to show the means used to carry the point intended. The charges are serious—but we know that those who bring them before the public, are aware of their falsity—they have evidence at their command, and which we think has been presented to them, that should disabuse their own minds, at least.

As regards the conduct and action of the Commissioners of Adams County, to which the paragraph particularly alludes, we speak knowingly, when we assert, that we have had every evidence before us of their conscientious discharge of duty; that nothing has been left undone to subserve the interests of the County—and that every member of the Board, would be as far from doing anything inconsistent with his sworn duty as Commissioner, as any man living. The charges are not only untrue, but base; and we regret to find them in a public journal in our midst.

It is easy to perceive the object to be attained; and we much mistake the people if they do not treat such wholesale slander as it deserves. Their object is a majority in the County—and, it appears, no means are to be left unresorted to, to accomplish this; but we have every confidence that our friends see their design, and will spare one, two, or even three or four days, to prevent a result so much to be deprecated, as the triumph of men who might be brought under the influence of those holding the principles and sentiments above alluded to.

OUR HARRISON WHIGS, be at your posts! See that every friend of our principles is at the polls! Never again suffer Locofocoism to triumph in our midst! Its principles, its actions, are such as ought not to flourish upon the soil of the "Young Guard!" Give the Ticket—the whole Ticket—a majority that will astound our adversaries!

The Whig Conferees of Cumberland, Franklin and Perry, have had their meeting and resolved not to nominate a candidate for Congress. They will generally support Gen. Miller.

The Hon. George Chambers was appointed by them the Delegate to the National Convention from that district. He is an ardent friend of Henry Clay.

Mr. McClellan, one of the rail-road sufferers, died at York on Friday week. The others are convalescent.

Monroe M. McClellan has been nominated as a candidate for Sheriff by the Whigs of the City and County. He is an able speaker, and we observe he has commenced "stumping."

Godley's Lady's Balm for Ointment, has been received. Its contents are beautiful, and its effects varied and interesting as usual, and all original. The Name is No. 1, and is a splendid Ointment, which our friends always do.

Great Fire—A fire broke out at 10 o'clock on Friday night, in the house of John H. McClellan, which was said to have been caused by a candle.

Pennsylvania College.

The ninth Commencement of this flourishing Institution took place on Wednesday last—and was of a highly interesting character. The number of strangers in attendance was unusually large; and we are gratified to learn from personal intercourse with many of them, that they were highly gratified with the exercises on the occasion, and with the Institution. In fact, no other feeling could be elicited from the interesting and talented exhibition of the Graduates—who all acquitted themselves in a manner to excite general admiration.

The following young gentlemen, delivered addresses on the occasion, and received the degree of A. B.

Alfred H. Smith, of Chambersburg, Pa.
John E. Graeff, of Pinegrove, Pa.
Charles Horner, of Gettysburg.
Wm. Paxton, of Caledonia, Pa.
John A. Reidenaur, of Lebanon, Pa.
D. H. Bittle, of Frederick co. Md.
David Knight, of Emmitsburg, Md.
Wm. H. Harrison, Frederick, Md.

The degree of A. C. was also conferred on John Rugan, of Philadelphia, and Wm. Kopp, of Huntingdon county, who were excused from delivering addresses.

The degree of A. M. was conferred, in course, on the class which graduated in 1840—Messrs. Bassler, Brown, Downey, Martin, Schwartz and Withrow.

The Baccalaureate Address by President Kauffman, was of the most impressive character.

We are pleased to learn, that there is likely to be a very large increase in the number of students at the coming session.

An interesting communication in regard to the "Alumni Association of Pennsylvania College," will be found in the preceding page.

The address delivered before the Literary Societies of Pennsylvania College, on Tuesday last, by the Rev. Mr. Tonn, of Pittsfield, Massachusetts, was of a high order, and has elicited universal approbation. We are pleased to see that it will shortly be published in pamphlet form.

A friend has handed us the following communication, which supersedes further remarks from us. We thank him for his favor.

For the Adams Sentinel.

Mr. Editor:—Having had the pleasure, within the last few days, of attending the exercises connected with the Annual Commencement of Pennsylvania College, permit me through your columns to express the gratification which they afforded me, in common with the large number of citizens and strangers who were present.

On Tuesday an Address was delivered before the Literary Societies of the College, by the Rev. John Tonn, of Pittsfield, Mass., and although from the high reputation of that gentleman as a writer, a treat of no ordinary interest was expected, yet those expectations were more than realized in the address itself, concerning which there is not one feeling among those who had the pleasure of listening to it, that of unmingled admiration; it is the production of a strong mind, enriched by cultivation, and aided by experience; it was directed, not only to the head, but to the heart, and the one was touched and made better, whilst the other was delighted and instructed. I am pleased to learn that the Address will be published, so that its influence may be extended and perpetuated.

In the evening of the same day, the Alumni Association of the College, was addressed by Rev. James R. Kiser, of Philadelphia, one of its members, in a style creditable to the speaker.

The "Commencement" of the College took place on Wednesday, when the degree of Bachelor of Arts was conferred on the members of the Senior Class of the present year and that of Master of Arts on several gentlemen former graduates of the Institution. In noticing the Addresses delivered on an occasion like the present, where all acquitted themselves so well, it might be improper, and it is unnecessary, to particularize individuals—let it suffice to say of all of them, that they were such as reflect honor, at once upon the young gentlemen themselves, and upon the Institution with which they have been connected; whilst they ensure for the speakers the high esteem of the public for their talents and learning, they speak volumes in favor of the course of instruction pursued in the College, and of the ability and faithfulness of those who administer it.

The whole of the proceedings were accompanied and overshadowed by music of a very superior order, furnished partly by the choir of "Christ Church," and partly by some gentlemen, amateurs, from this and some of the neighboring Towns. Altogether these exercises have been such as would be highly creditable to any Institution; and from their high character, the advantages which Pennsylvania College enjoys in various respects, and the increased interest which seems to be manifested on the part of her friends; we may hope that the time is not far distant when she will take the place to which she is so justly entitled, among the first of Literary Institutions of our Country.

The O.M. Fellows had a splendid procession at Baltimore on Monday last, on the occasion of dedicating a new hall. The number in attendance from different parts of the U. States was very great. One of the most imposing sights in the procession were nearly 150 children from the school established by the O.M. Fellows, for the education of orphans and destitute by deceased members.

The Festival—We learn that the festival of the Pennsylvania Canal, between Mifflintown and Lewistown, was much damaged by the rains of week before last.

The festival was thought to be ruined in a few days. In the meantime, however, between these two places are several houses.

Female Seminary.

On Thursday last, the examination of the pupils in this Institution took place. Other engagements, much to our regret, prevented our attendance; but we learn from those who were present, that it resulted very creditably to the Young Ladies and their estimable instructors. Miss Campbell, who has charge of the instruction in the Seminary, we are pleased to mention, displayed all who witnessed it, that she is perfectly "at home" in her vocation, and that untiring industry, and attention to the mental cultivation of her pupils, never were more clearly developed.

The number in attendance at the Seminary during the past session, has not been so great as, we think, should have been—but we hope to find, at the coming winter session, a very considerable improvement in this particular.

The large flouring mill, three miles from Baltimore on the Falls Turnpike, known as the Woodbury Mill, was totally destroyed by fire on Thursday morning last. The stock, consisting of 250 barrels of flour, 500 bushels of wheat, a quantity of feed stuffs, and nearly 1000 empty flour barrels, was entirely consumed.

The celebrated would-be Governor Dana was expected to arrive at Providence, R. I. last week. The Supreme Court is in session there, and it said he contemplates giving himself up for trial. The authorities were determined to arrest him when he entered the State.

Our correspondent W. has agreeably to promise, furnished us another communication in regard to the coming election, which we are unable to publish, owing to the late hour it was received, and the previous occupation of our columns. We have but room for the following concluding paragraphs:

"But they have found out, and it is carefully and ostentatiously paraded by them, that JOHN H. MCCLELLAN is a clerk in the Bank of Gettysburg, and they lift their hands and eyes in horror at that abominable connection. That infamous word 'Bank,' they think, will do the business, and elect DR. GILBERT! It is true, but Mr. McClellan is not a Director nor officer of the Institution, and has no more control over its affairs and management, than Dr. Gilbert, and, perhaps, not one-tenth part of the transaction with it in a business way. He is a mere writing clerk—a book-keeper—a keeper of accounts in it; but they presume so largely upon what they suppose to be the prejudice and hostility of the people to Banks in general, owing to the misconduct of many, that they think the very name needs call down vengeance on the head of this unlucky clerk. Do they think the people are so very ignorant that they cannot, or so prejudiced that they will not, discriminate?"

This disingenuous and unworthy attempt to create an unjust prejudice against a worthy citizen whose character they cannot and dare not assail, must prove abortive. I am sure no honest and discerning man, be he Whig or Democrat, will be influenced by it in the slightest degree.

Mr. McClellan is competent—he is honest—he is deserving of the office for which he is a candidate. He is known and esteemed. He is well acquainted with the duties of the office; and his experience as Clerk and Teller in the Bank, which is urged as the only objection against him, will enable him to save the County from loss, and sometimes the Collector of Taxes, also, by the detection of worthless, false or spurious issues among the money circulation which now, under the denomination of money, flood our country.

Next week, in continuation of the subject, it is my intention to submit some considerations in relation to the office of County Commissioner.

The steamer Victoria arrived at New York on Tuesday evening, bringing English dates to the 23d August. There is nothing of special importance. Markets remained about the same.

The celebrated American Vaulter, Mr. Aymer, met with a dreadful death at the English opera. He was attempting a double summerset, and instead of alighting on his feet, fell on his neck, and death was the immediate result.

LAITER—The Caledonia arrived at Boston, on Wednesday last, bringing dates to the 5th inst.

The most striking article of news is that of the visit of Queen Victoria and Prince Albert to France on the 21st inst. The most extensive preparations were made to entertain them by Louis Philippe, during the week they purposed remaining. Four queens would be present, of England, France, Belgium and Spain. The finest regiments of France were assembling, and the most distinguished Frenchmen. It would be a splendid affair.

It is the first time in three centuries, the crowned head of England and France have met in the latter kingdom on amicable terms, and will form an important epoch in the records of history.

Ireland—The recent agitation in Ireland has been as violent as ever. The potato crop has been so abundant that in some places they were sold as low as one penny a stone.

Parliament was prorogued by the Queen in person on the 21st inst. The Royal Family of France held a narrow escape for the party, ten in 19 o'clock, a narrow escape for the party, ten in 19 o'clock, a narrow escape for the party, ten in 19 o'clock.

a high bridge. The postillion had presence of mind to cut the traces of the fourth horse, before he had time to follow the leader, otherwise the whole party would have been dragged to instant annihilation. Louis Philippe appears to have a "charmed life."

James Gordon Bennett has written a long letter to the *London Times* about his "affair" with O'Connell.

Father Mathew was still in England; and it is estimated that over a million of persons have taken the pledge within the last two months.

The news by the Caledonia has caused an advance in Cotton of 5 cent per lb., and has reduced the price of Wheat at Baltimore a few cents a bushel, there being no expectations now of a demand from England for breadstuffs, the largest being abundant there.

Explosion.—Two of Dupont's powder Mills near Wilmington, Del. exploded on Thursday, killing a man named Michael Barrett. His body was blown to a distance of 300 yards, and was torn and crushed in a shocking manner.

The large barn belonging to Mr. Philip Nicodemus, near Westminster, Carroll county, Md. together with his entire crop of grain, hay, &c. was consumed by fire on Monday night last.

Why is a newspaper like a tooth-brush? Because every body should have one of his own and not borrow one of his neighbor's.

Whig Conferee Meeting.

At a meeting of the Democratic Whig Congressional Conferees of the Counties of York and Adams, held at the house of Michael Hoffman, in the Borough of Berwick, on Saturday the 23d inst.—on motion,

Mr. Jacob Wirt was called to the Chair, and George L. Fauss appointed Secretary.

On motion of Mr. Epley, it was Resolved: That it is inexpedient at this time, to place in nomination any individual to represent the Counties of York and Adams in the 28th Congress of the U. States.

Resolved: That we do hereby mutually pledge ourselves, that we will support no man for any office, whose principles do not accord with those of the Democratic Whig party; who is not in favor of a discriminating Tariff, sufficient for the protection of Home Industry against the pauper labor of Europe, and to afford an adequate amount of revenue to defray the expenses of the Government, honestly and economically administered, in order to avoid a resort to direct and oppressive taxation, upon an already too much oppressed people, without affording them, in return, a corresponding degree of benefit; and of a distribution of the proceeds of the sales of the Public Lands, upon just and equitable principles among the several States and Territories of the Union, in proportion to their respective population, having been purchased by the blood and treasure of our common country, and transmitted to their posterity for their common benefit and welfare.

On motion Resolved: That the proceedings be signed by the officers, and published in all the Democratic Whig papers in the District.

CONGRESS.

To the Voters of the 15th Congressional District, composed of the counties of York and Adams.

PAVING CITIZENS. The Governor of Pennsylvania, having vetoed the apportionment bill, under which I was a candidate for Congress, on the second day of July, 1899, I was elected and received the certificate of election from the return judge of the district; and that election, therefore, being considered void, from the receipt of a vote received on that occasion, and at the earnest solicitation and offers of support from numerous friends, I am again induced to present myself to your consideration as a candidate at the next election, for a seat in the 28th Congress of the United States.

I take this occasion to return my grateful acknowledgments to those persons who gave me their support at the former trial, and hope that in the coming contest they will again favor me with their votes and influence, and should I be so fortunate as to receive a majority of your suffrages, I pledge myself to maintain all matters concerning the administration of public affairs, the best interests of the country shall be carefully studied and be an object of primary consideration with me.

I am the people's obedient servant,
HENRY NES.

Protection against Loss

BY FIRE.

THE CUMBERLAND VALLEY

MUTUAL PROTECTION COMPANY.

PANY, being incorporated by an act of the Legislature of the present session, and fully organized and in operation under the direction of the following board of Managers, viz: Thomas C. Miller, C. P. Cummins, John Weakly, George W. McCullough, James Weakly, George Martin, William Moore, Samuel Galbraith, James Gresson, Thomas Paxton, William Barri, Joseph Culver and A. G. Miller, call the attention of the inhabitants of Cumberland Valley to the cheapness of their rates, and the many advantages which this kind of insurance has over any other.

1st. Every person insured becomes a member of the company and takes part in the choice of officers and the direction of its concerns.

2d. For insurance no more is demanded than is necessary to meet the expenses of the Company and indemnity against losses which may happen.

3d. The inconvenience of frequent renewals is avoided: by insuring for a term of five years.

4th. Any person applying for insurance must give his premium note for the cheapest class at the rate of five per centum, which will be \$50 on the \$1000, for which he will have to pay \$2.50 for five years, and \$1.50 for survey and policy, and no more unless loss be sustained to a greater amount than the funds on hand will cover, and then no more will be required than a pro rata share.

These rates are much cheaper than those of other companies, except such as are incorporated on the same principles.

Insurance is effected in the following manner: A person applying for insurance for property of the cheapest class of risk for \$1000 will be charged 5 per centum for five years, a note amounting to \$50 must be given by him, on which he will be required to pay 5 per cent, \$2.50, and \$1.50 for surveying and policy, and will have no more required of him unless losses occur and the funds on hand are not sufficient to meet them.

Agents will be appointed as soon as possible in different places to attend to insurances, and any persons wishing to insure immediately to apply can do so by signing their wish to the officers of the company.

A. G. MILLER, Sec'y.

Vegetable Life Pills & Phosphoric Bitters.

These pills were acknowledged as the best of all the numerous medicines that are offered to the public. Dr. Moffat's Life Pills and Phosphoric Bitters are daily and hourly sustaining the sound reputation which they have honestly and unostentatiously acquired. No person ever yet took them, even for a short period, without being so perfectly satisfied with their effects upon himself, as to recommend them to others.

The proprietor has never known or been informed of an instance in which they have failed to do good. In the most obstinate cases of chronic disease, such as chronic dyspepsia, torpid liver, rheumatism, asthma,

The Election.

From what we can learn from our friends in the country, the prospects of a handsome majority are very flattering. It is to be hoped that no pains will be spared to give our full vote on the present occasion. Our opponents having determined to poll their whole strength, we would be much pleased to show them how much we can beat them when we are disposed. We all feel the necessity of saving the two County boards from their control, and a little exertion to prevent this evil, is hoped and expected from every true Whig. Let every man be a committee-man, and see that our votes are out—and there is no danger.

Congress—Dr. Nes.

The conferees in this district having deemed it inexpedient to settle a candidate for Congress, it has thrown the matter open for the Whigs to vote or not as their wishes may dictate; and we suppose there will be some diversity of opinion and action amongst them in regard to this matter. The contest is between Dr. Small, the regularly nominated locofoco candidate, and Dr. Nes, a volunteer. We have been informed that there is a fair prospect of Dr. Nes receiving a majority in York County—and should he receive the votes of the whigs in this county, pretty generally, he has strong hopes of election. Dr. Nes has been longed to the loco focu party, but was friend of Gen. Harrison in 1840. He has, in a letter which was laid before the conferees, declared himself in favor of a Protective Tariff, and of the distribution of the proceeds of the Public Lands, and has, in conversation with us, thus declared himself in the most emphatic manner, and authorized us so to say. Under these circumstances, we have no doubt many will vote for this gentleman, his opponents being new to our ears, than those of Dr. Small, his opponent. The County Ticket as printed contains no name for Congress; but we are requested to state that Tickets for Dr. Nes have been printed, and will be sent to the different election polls for those who have the desire to vote for that gentleman.

The Tariff—Dr. Nes.

It is very much feared that an attempt will be made in the coming Congress to repeal the excellent Tariff passed by the last, and which has already had such a beneficial effect on the interests of the country. Threats have been made to this effect in high quarters; and we very much fear the attempt will be made. How important then might be a single vote! The fact that Dr. Nes is a publicly declared friend of the Tariff, and will resist every attempt to alter or repeal it, will be a strong inducement to many to throw their votes for him at the coming election.

Benjamin Weaver.

This gentleman who is on the Ticket for Canal Commissioner, is a native of Adams County, and is well and favorably known to many of our citizens. He is at present Sheriff of Allegheny county. We hope that his native county will give him a vote tomorrow week, which will reflect credit upon herself and upon him.

Meeting at Fountaindale.

There will be a Public Meeting held at the School House, at Fountaindale, on Wednesday evening next, at 6 o'clock, P. M. All who are in favor of correct principles, and of affording protection to American Industry, are invited to attend. Several speakers will be in attendance, among them Mr. Cooper.

Franklin County.

A meeting was held at Chambersburg last week, and a resolution passed recommending Robert B. L. as a candidate for Congress. Mr. B. had once, however, declined being a candidate, so that there are about thirty persons in the field, Park, and others, who are candidates.

Agricultural Exhibition.

The Baltimore County Agricultural Society intend to have their annual exhibition at Govansdown, on the 15th, 16th, and 20th inst. The list of premiums is liberal. The exhibition is limited to the productions of Baltimore City and County, except as regards essays and treatises on agricultural subjects, farming implements and machinery, which are solicited from any part of the United States. There will be a ploughing match on the last day.

At a late meeting of the Supreme Court of Ohio, held in Wayne county, James Addison Adair, of Zanesville, (formerly of Gettysburg,) was admitted as an Attorney and Counsellor at Law in the several Courts of that State. *Star.*

A great Agricultural Fair was held last week at Rochester, New York, at which the Hon. Daniel Webster delivered one of the most interesting & powerful speeches he has recently made, both for its intrinsic worth and political bearing. He discussed in an able and profoundly philosophical manner the relation of the land to the agricultural interests of every portion of this great nation, and denounced repudiation in the strongest and most emphatic language.

We are glad to learn from the Petersburg (Va.) Intelligencer that the manufacturing establishments in that town and its vicinity are in a very thriving condition. There are eight cotton factories in the town, some of them on a large scale, all in active operation.

Gamblers' Fight.—Some gamblers at Bison Rouge, on the 12th ult., fought over the card table, when one named Feason, shot another named Candero through the body, causing his death next day.

Better Late than Never.—The Madisonian News (Ind.) announces the marriage of Dominique Rages, and Catherine Antoine, both parties being over seventy. Whether they had arrived at years of discretion or not, is uncertain.

Singular Death of a Child.—An interesting child about six months old, daughter of Deacon Moses Wheeler of Barre, Mass., lost her life on the 10th ult., in a most singular manner. An attendant left the room where she was lying quietly on a bed, and returning in a few minutes, the child was found to have crept to the side of the bed near the wall and slid off. Her body passed between the bed and the wall, through an aperture not big enough to admit her head, and she remained suspended by the chin until life was extinct.

Horrid Murder and Robbery.—The New Haven Herald of Monday has the following account of a revolting murder committed near that place last Sunday:

A most horrid murder was committed at Middletown, Westfield, Society, Ct., upon the person of Mrs. Bacon, wife of Mr. Eben Bacon, a respectable and wealthy farmer of that place. Mr. Bacon went to church on Sunday morning with all his family except his wife, and did not return until after the evening service was over. When he returned he found his wife weltering in her blood. She lay upon her back in the centre of the room, her skull crushed in, her face horribly mutilated, her throat cut and seven stabs in her breast. By her side lay a butcher knife, some keys and three chairs, which were broken and bloody. Two of them were covered with fragments of her flesh and hair, used in beating her over the head.

The walls and floor were covered with blood, evidences of frightful, desperate ferocity, she in defending herself from the assaults of her savage murderers, and they in their diabolical exertions to overmaster this heroic but ill-fated woman.

It is supposed they found her alone, and in attempting to rob the house, she resisted them, and becoming exasperated, they committed the diabolical and most brutal murder. She was about 45 years of age.

She is represented as an estimable but courageous woman, of large frame, and just the person to resist an attempt at robbery. She has three children, and was universally esteemed, the whole family being members of the Presbyterian Church. The house was robbed of \$75.

Two persons named Bell and Roberts have been arrested at Middletown on suspicion of being the perpetrators of the horrid deed.

Asbestos.—This singular substance, which has as yet defied all the efforts of chemists to analyse it, inasmuch as it will neither melt by fire nor dissolve in water, and is entirely free from taste or smell, is found in considerable abundance in Pennsylvania, at no great distance from the borough of York.

An individual, a few days ago, found on Braddock's field, near Pittsburgh, an old pocket knife supposed to have belonged to Gen. Braddock, from the fact of its having his name engraved on the handle.

We observe by our late London papers, that the King of the French had signified his intention to reciprocate the friendly visit of Queen Victoria, by an excursion to England in the course of the present autumn.

A Name.—The infant daughter of the Queen of Persia, is to be baptized Diana Maria Anna Fernanda Leopoldina, Mihaela Retzela Gabriela Carolina Antonia Victoria Proxedis Gonzaga de Braganza Bourbon Saxe Coburg e Gotha.

In the preceding page will be found the proceedings of our friends in Huntington and Latimore. They are up and doing, and will show an excellent old-fashioned return to-morrow week. We learn they will generally support Dr. Nes for Congress.

There was also a meeting held at Abbots-town on Saturday last, which was very well attended—and there appeared to be an excellent spirit abroad. We have not received the proceedings—but we learn the meeting was addressed by Mr. Cochran of York, and Messrs. Cooper, Smyser, and M. Sherry, of Adams.

We learn from Menallen, that the Whigs are generally going into the support of the independent candidate, Dr. Nes.

A shocking murder was committed in Baltimore on Thursday evening last, in Mulberry street, upon a very respectable young female, named Ann Maria Burk, who lived in the family of Randall H. Moore, Esq., in Franklin street. She was on her way to Mr. Poutney's to bring home a child of Mr. Moore, when a man not known came up behind her, and struck her with a bludgeon, which fractured her skull, and caused her death in a few hours. There is great excitement, and the Mayor has offered a reward of \$500.

Vermont.—The official vote for State Senators at the late election held in Vermont has been received from all the counties but one. [Grand Isle] which is supposed, to have elected a Whig. If this supposition be correct, the Senate this year will stand twenty-one Whigs, nine Locofocos. Last year there were sixteen Whigs to fourteen Locofocos—showing a net gain at the late election of ten Senators.

The Rev. Dr. Wm. C. Brownlee, of the Dutch Reformed Church, of New York, lies in a very precarious state at Newburg, and his life is despaired of. While passing through the streets with the Reverend Mr. Van Zandt, he was seized with an apoplectic fit, fell on the pavement, and was conducted to the nearest house.

On Wednesday morning last, by the Rev. James C. Watson, Alexander R. Stevenson, Esq., to Miss Margaret S., daughter of Mrs. M. Wierott—all of this borough.

On Monday night last, Mr. Frederick Berlin, of Hamilton township, in the 73d year of his age.

On the 21st ult. in Abbots-town, Mr. Jacob Ketterer, in the 33d year of his age.

On Monday morning last, in the prime of life, Mr. John Snodgrass, of Berwick township.

On the 27th of August, at Quincy, Ill., Miss Elizabeth M. D. McDonald, formerly of this county.

CONGRESS.

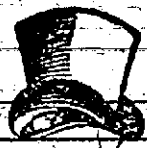

To the Voters of the 15th Congressional District, composed of the counties of York and Adams.

FELLOW CITIZENS:—The Governor of Pennsylvania, having vetoed the apportionment bill, under which I was a candidate for Congress, on the second Tuesday of October last; I was elected and received the certificate of election from the return Judges of this district; and that election therefore being considered void; from that occasion, and at the earnest solicitation and offers of support from numerous friends, I am again induced to present myself to your consideration as a candidate at the next election, for a seat in the 28th Congress of the United States. I take this occasion to return my grateful acknowledgments to those persons who gave me their support at the former trial; and hope that in the coming contest they will again favor me with their votes and influence, and should I be so fortunate as to receive a majority of your suffrages, I pledge myself that in all matters concerning the administration of public affairs, the best interests of the country shall be carefully studied and be an object of primary consideration with me.

I am the people's obedient servant,
HENRY NEGUS.

Anti-Biliary Pills.

THIS Cathartic compound combines smallness of bulk with efficiency, and comparative mildness of purgative action, and having a peculiar tendency to the biliary organs, is extremely valuable in this country, in which bilious fevers and other complaints attended with congestion of the liver are much abundant. They have now been in use 16 years, and experience has proved them to be a valuable and efficient remedy, in all complaints in which a cathartic is indicated. They are especially adapted for a family Cathartic, and for this purpose are not surpassed by any other pill in use. Price 25 cents for a box containing 30 Pills.

OAKRIDGE

Select Academy.

AT the close of another Session the subscriber feels it his duty to return thanks to his patrons for the liberal encouragement which he has continued to receive, and to inform them that the FOURTH SESSION will commence on Thursday the 19th day of October, and continue from that time 21 weeks.

Besides all the ordinary branches of an English, Classical and Mathematical education, the Winter Session includes Chemistry, which is illustrated with appropriate experiments and apparatus. Surveying with field practice, in which the student is allowed the use of very superior instruments. Physiology, including Human Anatomy, which will be illustrated by a good collection of specimens—and other subjects of importance.

It will be remembered that only a limited number of pupils can be received, and that whilst they have an opportunity of pursuing a regular and extensive course, they are also at liberty to confine their attention to those subjects which they may think of most importance to themselves.

In Mathematics the pupils are neither classified or confined to uniform textbooks, but each has an opportunity of making that progress which time and talents will permit. This arrangement, whilst it tends greatly to the labor of the teacher, affords, it is believed, unusual advantages to the pupil.

Seven acres of woodland are attached to the school, in which the pupils are permitted to engage in a great variety of exercises calculated to develop every part of the muscular system, produce a strong constitution, and lay a foundation for good health and active usefulness.

Terms for Tuition, board, washing, lodging, fuel, lights &c. 75 per session; or in proportion for a shorter time.

For Tuition alone, 15.

The Examination which closes the session, will take place on Wednesday September 18th. These examinations are not designed as public exhibitions; the object is principally to give parents an opportunity of judging of the progress and relative qualifications of their children; for these reasons we have no heretofore given general invitations, and as some of our friends have been displeased, we beg leave to offer our apology, and assure them and others, that although they will be disappointed if they expect to be much entertained, they are still very welcome, and their presence will afford us much pleasure. We therefore invite all who wish to be present at the examination.

Persian Pills.

IF it is now a settled point with all who have used the Vegetable Persian Pills, that they are pre-eminently the best of all of those famous family medicines that have yet been used in America.

If every family could become acquainted with their sovereign power over disease, they would keep them and be prepared with a sure remedy to apply on the first appearance of disease, and then how much distress would be avoided and money saved, as well as lives of thousands who are hurried off to time by neglecting disease in its first stages, or by not being in possession of a remedy which they can place dependence on. All who wish to guard against sickness, should use the Persian Pills freely, when needed; no injury can ensue, if used from youth to old age, when taken according to the directions.

Protection against Loss BY FIRE.

THE CUMBERLAND VALLEY MUTUAL PROTECTION COMPANY, being incorporated by an act of the Legislature of the present session, and fully organized and in operation under the direction of the following board of Managers, viz: Thomas C. Miller, C. P. Cummins, John Moore, David W. McCullough, James Weakly, George Martin, William Moore, Samuel Galbraith, James Greason, Thomas Paxton, William Barr, Joseph Culver and A. G. Miller, call the attention of the inhabitants of Cumberland Valley to the advantages of their rates, and the many advantages which this kind of insurance has over any other.

1st. Every person insured becomes a member of the company and takes part in the choice of officers and the direction of its concerns.

2d. For insurance no more is demanded than is necessary to meet the expenses of the company, and indemnity against losses which may happen.

3d. The inconvenience of frequent renewals is avoided by insuring for a term of five years.

4th. Any person applying for insurance must give his premium note for the cheapest class at the rate of five per centum, which will be \$50 on the \$1000, for which he will have to pay \$250 for five years, and \$150 for survey and policy, and no more unless loss be sustained to a greater amount than the funds on hand will cover, and then no more will be required than a pro rata share.

These rates are much cheaper than those of other companies, except such as are incorporated on the same principles.

Insurance is effected in the following manner: A person applying for insurance for property of the cheapest class of risk for \$1000 will be charged 5 per centum for five years—a note amounting to \$50 must be given by him, on which he will be required to pay 5 per cent, \$250, and \$150 for surveying and policy, and will have no more required of him unless loss occur and the funds on hand are not sufficient to meet them.

Agents will be appointed as soon as possible in different places to attend to insurances, and any persons wishing immediately to apply can do so by signifying their wish to the officers of the company.

HEBREW PLASTER.

THIS receipt, obtained of an old Jew, by a traveler in the Eastern countries, bids fair to be of immense value to the Western world. Since this Plaster has been introduced into America, every other plaster, salve, ointment, or liniment has been discontinued by all who have had an opportunity of testing the superior medical virtues of the Jew David's or Hebrew Plaster. Truth, though simple, is powerful, and will prevail with an enlightened community, over all the puffings and fictitious affidavits with which the world is flooded. The sterling worth of this plaster is appreciated, and its use sanctioned by the highest classes of society. One simultaneous burst of approbation arises from the thousands who have used it, which shows that when a remedy possesses highly intrinsic merits like this, it does not fail of receiving the patronage of the intelligent public. DR. MOFFAT'S Vegetable Life Pills & Phlox Bitters.

THEY are very where acknowledged as the best of all the numerous medicines that are offered to the public. Dr. Moffat's Life Pills and Phlox Bitters are daily and hourly sustaining the sound reputation which they have honestly and unostentatiously acquired. No person ever yet took them, even for a short period, without being so perfectly satisfied with their effects upon himself, as to recommend them to others.

The proprietor has never known or been informed of an instance in which they have failed to do good. In the most obstinate cases of chronic disease, such as chronic dyspepsia, torpid liver, rheumatism, asthma, nervous, and bilious head-ache, costiveness, piles, general debility, scrofulous swellings and ulcers, scurvy, salt rheum, and all other chronic affections of the organs and membranes, they effect cures with a rapidity and permanency which few persons would theoretically believe, but to which thousands have testified from happy experience. In colds and coughs, which, if neglected, superinduce the most fatal diseases of the lungs, and indeed the viscera in general, these medicines, taken but three or four days, never fail taken at night, they so promote the insensible perspiration, and so relieve the system of febrile action and feculent obstructions, as to produce a most delightful sense of convalescence in the morning; and though the usual symptoms of a cold should partially return during the day, the repetition of a suitable dose at the next hour of bed time will almost invariably effect permanent relief, without further aid.

The retail price of the Life Pills is 25 cents per box, or in larger boxes at 50 cents and \$1. The Phlox Bitters are sold in bottles at \$1 and \$2 each.

The above valuable medicines are for sale at the Drug store of S. H. BUEHLER, in this place.

IMPROVEMENT IN WATER WHEELS.

THE subscriber takes pleasure in informing the owners of Mills and other Machinery, that he has made an important improvement in the construction of Water Wheels, which will be found far superior to any Water wheels now in use—for the following reasons:

1st. They will do the same work with one third less water than any underground or reaction wheel. 2d. They are much more simple and less expensive to build. 3d. They are much more durable, being cast-iron wheels. And 4th, they are never obstructed by ice, nor impeded by back water. I speak with confidence concerning these Wheels. I have two of them in operation in my Mill, which have run about fifteen months, and during which time they have performed admirably well, and fully sustain the recommendation here given them. Their wheels run horizontally under water, and will answer to any fall from 3 feet to 15 feet; and will answer for Saw mills, or any other machinery requiring water power, and can be applied to gears or straps. I prefer the latter. I have three pairs of stones in my Mill, all running by straps—I have not a cog-wheel in the Mill. We find the straps to answer well, if properly constructed; they are infinitely cheaper, and they render the whole plan so very simple, that in fact there seems to be nothing to wear out or rot. The millwright work to one of these wheels, and all necessary gearing to run one pair of stones, can be made, and the cast wheel furnished and put up, for about fifty or fifty-five dollars, boarding found, and which in fact will answer to run two pairs of stones alternately. Think of this, all that are concerned. A cast water-wheel that may last for ages, and all the gearing necessary, for about \$50! The cast water-wheels used in the Western country cost \$100 at the furnace, and are not half so good an article. All water wheels that are put up under my direction, will be warranted to perform as I say; if they do not, I will have them taken out and make no charge for the work. I have now had a fair trial of them through all seasons, and am fully satisfied that the wheels will answer in every particular.

Having obtained a Patent-Right for the above improvement, I am now prepared to sell the right and privilege of using this plan of Water-wheels to all who may be disposed to buy it.

I am desirous of appointing Agents in different sections of the country, to build wheels on the above plan, and to sell the right of using them. All letters addressed to me in Adams county, Pennsylvania, will be promptly attended to.

Cure for Worms.

R. A. FAHNESTOCK'S Vermifuge has been in use over 15 years, and is now considered the safe and efficient remedy for expelling worms from the system. In this city its success has been astonishing; scarcely an instance in which there has been a failure, save when worms were the cause. I can refer to a gentleman of the highest respectability, who had expended one hundred and fifty dollars in medical fees for a daughter, without any apparent benefit. He was induced to use this medicine, and he tells me he was actually alarmed at the quantity of worms voided, after using two bottles, she was enabled to go to school, and is now enjoying good health.

Be cautious of a spurious Vermifuge, put up in the same style as Fahnestock's, which is attempted to be sold as his. Price 25 cents.

Sand's Sarsaparilla.

THE attention of the reader is respectfully called to the following certificates. However great achievements have heretofore been made by the use of this invaluable medicine, yet daily experience shows results still more remarkable. The proprietors here avail themselves of the opportunity of saying that the source of constant satisfaction that they are made the means of relieving such an amount of suffering.

Messrs. Saxes: Gent.—Words cannot express the gratitude I feel for your treatment to me, a stranger suffering under one of the most loathsome diseases that nature is capable of bearing. The disease with which I was afflicted commenced with inflammation of the eyes, in the year 1836, which caused almost total blindness. For this I was treated and finally relieved, but the remedies were such as to cause the development of a scrofulous affection on my left arm near the elbow.

The pain extended from the shoulder to the end of my finger, and for two years my sufferings were beyond description. I tried various remedies and consulted different Physicians in New York, and amongst them the late Dr. Bush, who told me the disease of the arm was caused by the large quantity of mercury taken to cure the inflammation of my eyes.

My sufferings continued, the arm enlarged, tumors formed in different places, and in a few months discharged, making ten running ulcers at one time, some above and some below the elbow, and the discharge was so offensive that no person could bear to be in the room where I was. I then applied to another distinguished Physician who told me amputation of the arm was the only thing that could save my life, as it was impossible to cure so deadly a disease; but as I was unwilling to consent to it he recommended me to use Swalm's Panacea, freely, which I did without deriving but little benefit. For three years I was unable to raise my hand to my head or comb my hair, and the scrofula now made its appearance on my head, destroying the bone in different places, causing extensive ulcerations, and I feared it would reach and destroy the brain—the head swelled very much, accompanied with violent pain, numerous external remedies were recommended, but they did no good. About a year since I was taken severely ill with a swelling of the body from head to foot, so that I was entirely helpless; the Doctor advised me to go to the hospital, for he did not understand my case for the last few months I had been afflicted with a severe pain on both sides, at times so hard I could scarcely get my breath. A hacking cough constantly annoyed me, and this combined with my other troubles, rendered me truly miserable. Such gentlemen, had been my situation for seven years of my life when I commenced the use of your Sarsaparilla, but as my case was considered hopeless, and the near prospect of
